SC 650

A close-up photograph of a metal panel, likely from an aircraft. The panel is dark grey or black with a silver-colored metal frame. The text "SC 650" is printed in a white, outlined font at the top right. A silver-colored metal connector is visible in the center of the panel. The panel is mounted on a grey perforated metal surface. The connector is a cylindrical metal fitting with a hexagonal base and a threaded section. The panel is secured with several screws around its perimeter. The overall appearance is that of a high-quality, industrial-grade component.
